Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
- I want my credit card application to be processed quickly. - I expect a fair and transparent approval process. - I hope my financial details are evaluated accurately.	- Will my income and employment history be sufficient? - Is my credit history good enough for approval? ☐ .
Credit Card Applicant/ Customer	

- Fills in the online credit card application form.
- Provides personal, employment, and financial information.
- Waits for the approval or rejection decision from the bank.

DOES

- Excited about getting a new credit card.

FEELS

- Anxious while waiting for the approval result.
- Satisfied if the application is processed quickly and fairly.
