

Demonstration of Proposed Features

Date	4 july, 2026
Team ID	SWTID-2026-5594
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Data Preprocessing	Cleaned dataset, handled missing values, encoded categorical features	Implemented	Yes	Successfully demonstrated in Jupyter Notebook
2	Machine Learning Model Training	Trained Logistic Regression, Decision Tree, Random Forest, and XGBoost models	Implemented	Yes	Compared model performance and selected the best model
3	Credit Card Approval Prediction	Predicts whether a credit card application is Approved or Rejected	Implemented	Yes	Prediction integrated into the Flask application
4	Flask Web Application	Developed a web application to accept applicant details and display predictions	Implemented	Yes	Successfully demonstrated in a web browser
5	Interactive Dashboard	Built a user-friendly dashboard with prediction form and project statistics	Implemented	Yes	Dashboard demonstrated during testing
6	Model Deployment Preparation	Saved the trained model (model.pkl) and prepared it for deployment	Implemented	Yes	Ready for deployment using Flask/IBM Watson

Feature Implementation Summary:

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
