

Coding & Solution

Date	4 july 2026
Team ID	SWTID-2026-5594
Project Name	Credit Card Approval Predict System
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Project Name	Credit Card Approval Prediction Using Machine Learning
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Flask, Bootstrap 5
Machine Learning Algorithms	Logistic Regression, Decision Tree, Random Forest, XGBoost
Libraries Used	Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Joblib, Flask
Database	CSV Dataset (application_record.csv and credit_record.csv)
Development Tools	VS Code, Jupyter Notebook
Version Control	GitHub

Code Quality Checklist

Criteria	Status
Code is modular and organized	yes
Meaningful variable names	Yes
Comments included	Yes
Error handling implemented	Yes
Application runs successfully	Yes
Code committed to GitHub	Yes

Additional Notes / Comments:

Algorithm	Accuracy
Logistic Regression	98.53%
Decision Tree	98.30%
Random Forest	98.69% (Best Model)
XGBoost	98.60%
