

No. of Functional Features Included in the Solution

Date	4 July 2026
Team ID	SWTID-2026-5594
Project Name	Credit Card Approval Prediction System
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No Feature Name Feature Description Module / Component Status Marks Contribution

1	User Login Dashboard	Professional dashboard for accessing the application	Frontend	Done	High
2	Applicant Details Form	Collects applicant details such as income, education, employment, etc.	Frontend	Done	High
3	Data Preprocessing	Cleans data, handles missing values, and encodes categorical variables	Machine Learning	Done	High
4	Machine Learning Model	Trains Logistic Regression, Decision Tree, Random Forest, and XGBoost models	ML Module	Done	High
5	Best Model Selection	Compares model 1 performance and selects Random Forest	ML Module	Done	Medium
6	Credit Card Prediction	Predicts whether the applicant is Approved or Rejected	Prediction Engine	Done	High
7	Result Display	Displays prediction result on the web page	Flask Backend	Done	Medium
8	Model Storage	Saves trained model using Joblib for future predictions	Backend	Done	Medium

Feature Summary:

Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	8
Additional / Nice-to-Have Features	2 (Professional Dashboard, Bootstrap UI)
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	Dashboard, Prediction Form, Result Page	Bootstrap Dashboard, HTML Forms
2	Backend / Logic	Flask Application, Prediction Logic	app.py, Model Loading
3	Database / Storage	C SV Dataset, Trained Model	application_record.csv, credit_record.csv, model.pkl
4	API / Integration	Flask Routing	/, /predict, /dashboard
